Connecting the Phone

The following illustration shows how to connect the power, LAN and PC ports of VoIP phone.

The following illustration shows how to install the phone and stand.

3 Operation

Answering a Call

An incoming call is indicated by a ringing tone. You can answer the call by doing one of the followings:

- Pick up the **Handset** to answer the call.
- Press the **LINE (LINE1/LINE2)** key to answer the call.

Making a Call

Dialing with the Keypad

- Enter the telephone number with the alphanumerical keypad.
- After entering the number you want to call, press the **#** key to force dialing or wait for 4 seconds before the number is dialed automatically.

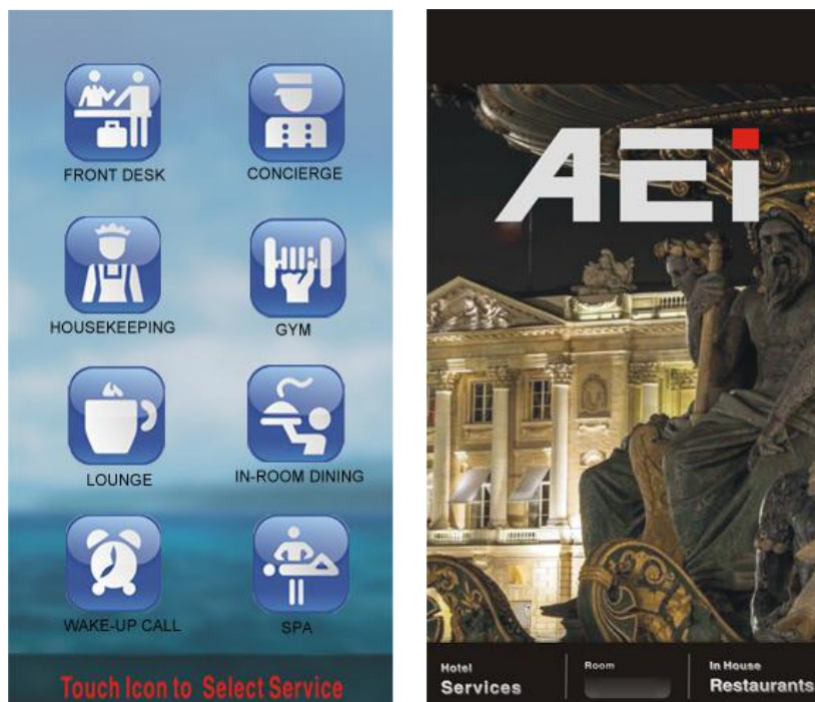

Using the Programmable Service keys

You can use the pre-assigned service hotkeys, to configure the most commonly dialed numbers. Use the function to dial a number quickly, instead of keying in a complete number.

To call a number using service hotkeys, follow the steps below:

- Press the service hotkeys that has been pre-assigned to the phone number and the call will start automatically.

Using the on-screen programmable service function soft keys

You can use the pre-assigned service function, to configure the most commonly dialed numbers. Use the function to dial a number quickly, instead of keying in a complete number.

To call a number using service soft keys dialing, follow the steps below:

- Press **hotel Services** soft key.
- Press service icon soft key to precede service dial.

Call Options

While a call is in progress, a number of additional options are available.

Using the Speaker Phone

For hands free operation, you can use the built-in speaker to talk on the phone. To use the speakerphone, follow the steps below:

- While talking on the phone, press the **SPEAKER** key on the phone to enable the Speakerphone function.
- Press **SPEAKER** key again to terminate the call.

Putting a Call on Hold

You may want to put a call on hold temporarily while doing some work or attending to a second incoming or outgoing call. To put a call on hold, do one of the following:

- Press the **HOLD** key on the phone to put the call on hold.
- When you receive a second call, press the next available **LINE** key to attend to the new call, and the first call will be put on hold automatically.

Checking Voice Messages

If the **MESSAGE** key LED is red, it indicates that there are one or more new messages in voicemail box.

- Press the **MESSAGE** key on the phone to retrieve voice messages.

(An external ITSP or PBX must support voice message feature. And you need to set a voice message code before using the voice mail feature.)

4 Support

To configure through the web browser, do the following:

- Ensure the phone is powered up and connected to a DHCP network.
- Press HOLD/MUTE *112*113# (HOLD for 2-Line / MUTE for 1-Line), the IP address is displayed on the LCD screen.
- Open your browser (such as Chrome, Firefox, etc.) and type in the web address of the phone. For example, `http:// IP.address.of.thePhone:8000`

When the Web login front page is displayed. Enter the user name and the password and click **Login**.
The administrator's user name and password are "admin" and "1234" respectively.
